

BRINGING CLARITY TO RISK

**Reduce Risk, Be More Resilient, Embrace
Digital Transformation With Holistic,
Quantifiable Risk Intelligence From Acuity**

Globalization, digital transformation and shared service models are driving companies to rethink their approach to risk and compliance. Traditional methods are falling short, leaving companies exposed. A more comprehensive approach is needed to manage the growing and evolving risks facing businesses in today's interconnected world.

Risk, Resilience and Transformation

Strong risk management starts with accurate and actionable risk intelligence – good visibility into the cyber, regulatory, operational and other risks facing the business. *Otherwise, executives are operating in the dark, making decisions based on assumptions, wishful thinking or guesswork.*

A “good” program is one that provides the business with resilience to many different events. While it may not be possible to avoid all breaches, companies need to try to manage risk within their own tolerance philosophy. As budgets become increasingly tight, the ability to manage risk within tolerance will require more effective and efficient use of resources as you address the risks that could cause the greatest harm and in proportion to the level of those risks. Investments need to be justified and returns measured to make risk-informed strategic decisions.

Risk management is a continuous journey and the most important step is building a risk-based approach - identifying, prioritizing, delivering and managing the controls that will reduce risk.

It requires aligning with the company’s overall enterprise risk management framework and the business’s tolerance for risk and it should involve stakeholders across the enterprise. A strong risk management strategy allows prioritization of investments in programs that will have the greatest impact on reducing risk.

What Are “Good” Risk Management Outcomes?

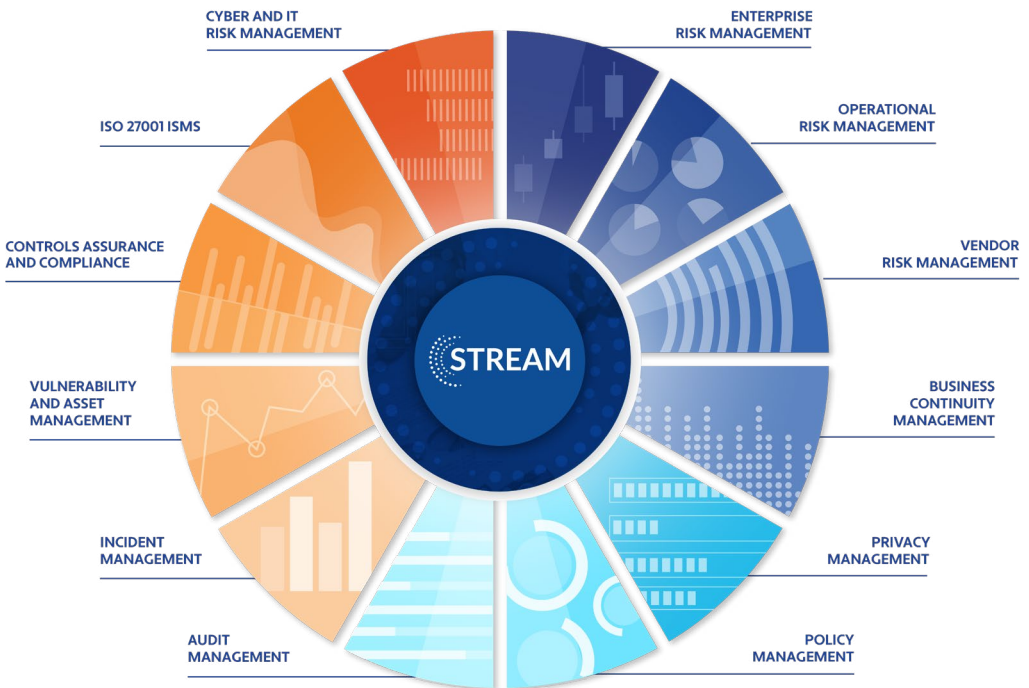

- ✓ Resilience to loss events
- ✓ Effective and efficient use of resources
- ✓ Optimized spending
- ✓ Justified and comprehensible investment
- ✓ Risk-informed decision making
- ✓ Integrated approach across multiple disciplines
- ✓ Continuous optimization
- ✓ Confidence building for stakeholders

“**Good risk management aligns with and enhances achievement of the board’s objectives.**”

– Simon Marvell, CEO, Acuity Risk Management

STREAM Integrated Risk Manager: An Expertly Engineered Solution

Create a strong foundation for managing cyber, regulatory, operational and other risk with Acuity's STREAM Integrated Risk Manager. STREAM provides an always-on, clear line of sight into exposure to enable companies to manage, control and report on risks, effectively.

Our Risk-Centric Solution Provides:

FLEXIBILITY

When it comes to risk management, one size does not fit all. Every company's risk strategy is unique and STREAM allows each company to select their preferred methodologies, assessment schemes, dashboards and reports.

VISIBILITY

All risk-related information is available on a single-screen.

This visibility allows companies to make better, risk-informed decisions.

CONFIGURABILITY

Unrivalled ability to configure or add integrated risk management applications to company-specific requirements via the user interface without the need for custom coding.

QUANTITATIVE ANALYTICS

Sophisticated analytics for both qualitative and quantitative assessment of risk, evaluation of investment proposals and risk-based prioritization of actions.

DASHBOARDING AND REPORTING

Personalized dashboards with a rich set of standard and custom reports for communication with business leaders, auditors, regulators and other stakeholders.

EASE OF DEPLOYMENT

SaaS or on-premise deployments available. This includes efficient migration of data from existing or legacy risk management systems with minimum fuss.

RAPID TIME TO VALUE

STREAM can be operational and providing value within a matter of weeks, which is faster than competitors.

A Proven Risk Solution

A strategic partner, Acuity works with leading global companies to build their risk management strategies.

“

We are able to pull together data across all products and generate reports in minutes, when it previously required days of effort.”

– James Stewart, Chief Risk Officer, Midland States Bank

Quantifying Risk: Understanding & Managing Exposure

STREAM is one of the only solutions that empowers companies to seamlessly quantify and aggregate their risk, enterprise-wide, without the need for a plug-in component.

STREAM enables risk managers to provide executives with critical information in real time:

- ✓ An overview of the identified risks in financial terms
- ✓ Details of the residual risk (and whether it is within management's tolerances)
- ✓ Compliance status with regulations and standards
- ✓ If necessary, the actions that need to be taken to bring the residual risk within risk appetite
- ✓ Progress monitoring to track actions through to completion

With STREAM, manage risk strategically whilst ensuring compliance with various overlapping regulations, standards and frameworks, such as **ISO 27001, GDPR, PCI-DSS, ISF, NIST Cyber Security Framework, the Open FAIR™, COSO** and internal standards too.

TAKE CONTROL OF RISK

Acuity Risk Management helps businesses worldwide effectively manage, prioritize and report on their risks to inform strategic decision-making and build long-term resilience.

Its powerful STREAM platform provides rapid time to value to reassure stakeholders that risks are under control and compliance is maintained with increasingly complex standards and regulations. With STREAM, Acuity eliminates the guesswork around risk to support strategic decision-making, prioritization of resources and justification of expenditure to maximize ROI.

With customers worldwide, Acuity has proven success supporting customers in highly regulated and targeted industries such as finance, IT, telecommunications, healthcare, defense and government.
